Programme overview

This programme is designed for those who are looked to in a crisis – the leaders whose performance can spell the difference between success and failure in challenging times.

To have that positive impact, you need to understand how crises change the dynamic of decisions and influence the way people react to different forces at play. To be effective in a crisis, leaders must understand the human factor in their response plan.

Crisis Leadership and Human Behaviour is an immersive programme designed to give you the leadership tools and behavioural insights to meet the challenges of today and tomorrow. Rich case studies coupled with a ground-breaking live interactive real-time simulation to bridge the gap between the rigour of theory and the white heat of practice. Designed and led by LBS faculty, with expertly guided peer-to-peer learning throughout, this three-week programme offers a dynamic blend of live interactive sessions, reflection and practical application.

Who is this programme for?

Participants will have a minimum of three years’ management experience, and will include:
- Crisis Managers and Risk Management executives
- Communications and Public Relationships Executives
- HR Directors and Learning and Development Directors
- Organisational Change and Transformation Directors
- Public Health and Public Policy Officials
- Mid- to senior-level managers making key decisions, including those without a specific Crisis or Risk Manager remit.

Programme content

Crisis Leadership and Human Behaviour is ideal for leaders navigating today’s demanding and unpredictable world. You will:
- Identify and challenge your preconceptions on the nature of a crisis and its impact on judgement, decisions and behaviour
- Develop techniques for successfully solving problems in high-pressure crisis situations, characterised by complex environments, time pressures, high stakes, unanticipated events and information overload
- Enhance and deepen your communication strategies with multiple stakeholders – internally, the public, the media and activists.
- Understand the psychological dynamics required when you need to rebuild trust and reputation in the immediate aftermath of a crisis.

Programme content

Through our unique learning journey and insights from world-class faculty, your organisation will:
- Be equipped to better manage a crisis in a dynamic and fast-changing world
- Understand why the ‘human factor’ is the single biggest variable in a crisis, and learn how to leverage it rather than crumble under pressure
- Have a greater awareness of the burden decision-makers face in a crisis and how pressure can skew decisions
- Develop mitigation strategies and small behavioural nudges based on a deeper understanding of the research into recurring patterns of human behaviour that characterise the reaction to crises
- Respond decisively when your reputation has been damaged and start rebuilding trust rapidly
- Communicate quickly and appropriately with a range of stakeholders.
- Adopt a mindset and culture that enables learning from past crises.

Experts in the field

Niro Sivanathan
Associate Professor of Organisational Behaviour

Dr Sivanathan’s research focuses on how social hierarchy and the psychological experience of status and power regulates judgement, decisions and behaviours. He co-directs the Decision-Making Strategies for leaders programme, and directs the Leading Teams for Emerging Leaders programme. His teaching portfolio also includes the Negotiating and Bargaining elective for degree programmes and Influence and Persuasion for Executive Education programmes.

David Faro
Associate Professor of Marketing

Dr Faro’s research focuses on consumer decision-making, particularly in the domains of health and finance. He has also published research on how managers react to risk and uncertainty. Dr Faro co-directs two Executive Education programmes at London Business School: Strategic Branding and Decision-Making Strategies for Leaders. He also teaches Behavioural Economics and Decision-Making for degree programmes.
